SYSTEM AND METHOD FOR INSTALLING SOFTWARE ONTO A BUILD-TO-ORDER COMPUTER SYSTEM USING AN IDENTIFICATION DEVICE

5

Abstract of Disclosure

A system including a server, a computer system, and a device coupled to a port of the computer system is provided. The server includes a script associated with an identifier. The device includes the identifier. The computer system is

10   configured to read the identifier from the device, provide the identifier to the server, and cause a script associated with the identifier to be executed to cause one or more software components to be installed onto the computer system.
